You will be prompted that ask to enter a name for your new folder. From the pyReScene start menu, select "Open" Navigate to wherever you saved the "rescene3.exe" "rescene3.config" and "rescene3.py" When you are asked if you would like to save changes to the pyReScene configuration, choose "Save as" Confirm the name of the new config file

---

(rescene3.config) Change the contents of the configuration file

Open the "rescene3.config" using Notepad (or any text editor) Now, we need to add a line to the "rescene3.config" which will select a directory for the release management. Choose the "Open" menu, and select the "Add Directory" option. Navigate to the location where you unzipped the pyReScene3.zip file, and click to select the file. Now you have to select the option "Add folder" to add it to the release management. Now, repeat the "Open" menu and

---

choose "Save" Saving the configuration file. The "Save as" dialog will prompt you to enter a name for your new file. Enter "rescene3.config" in the location.

Now, pyReScene will not do anything. It won't even prompt you for changes in the configuration file. All right now, the next part is to modify the "rescene3.config" and "rescene3.py" based on the directory of your scene. Open the "rescene 09e8f5149f
