Each application is developed for use on specific operating systems, typically Windows, Macintosh, and Unix. The US Navy uses a combination of AutoCAD and AutoCAD LT. (source: www.nationalinterest.org) A product description of AutoCAD applications is available on the company website and in the user's manual. AutoCAD is a commercial CAD software application that was first released in 1982, with the introduction of AutoCAD for the Mac. Autodesk released its first AutoCAD desktop application for Windows in 1989, followed by AutoCAD LT and AutoCAD Map 3D. AutoCAD has the ability to create and manipulate 2D and 3D CAD models. AutoCAD LT is a simple version of AutoCAD for 2D drafting. Autodesk replaced AutoCAD LT in 2007 with AutoCAD R15. (source: www.autodesk.com) AutoCAD is available in several different editions, which vary in features and costs. The most affordable commercial version is AutoCAD LT. The other editions, AutoCAD 2010, AutoCAD R2012 and AutoCAD R2014, are similar to AutoCAD LT, but are more feature-rich. AutoCAD MAP 3D, a native mobile application that works on iPad, iPhone, and Android devices, was introduced in 2011. Drafting Quick stroke A basic method to create straight lines

There are also a number of 3rd party libraries for writing AutoCAD add-on applications. Category:Computer-aided design softwareQ: Accessing other resources in TestRig I've been playing around with the TestRig and writing custom tests. I've got pretty far but I'm still struggling to understand the concept of resources. I'm a beginner, so bear with me. I'm trying to write a "hello world" test. I can run the basic tests no problem, but when I try to access resources outside of my app, I'm completely lost. I get the same error message regardless of whether I call the test method from the testrig app or from the unit test. I've created a resource called /hello. In the unit test, I've tried to access it via: R.hello R.hello.text R.hello.getText and I get the error message: "Error: Failed to find resource 'com.intellij.ui.IdeaFlare#HelloWorld". A: I ran into this problem before. I think you have a misconception about resources. Resources are for creating UI elements that are meant to show up on the screen. You can't access the resources from a test because they are not on the screen. So I think your resources are just getting imported to the default resources folder. You need to create your UI element in code, and then have an image resource in your project. Q: Redirect to custom 404 page in django I am using Django and Django Rest Framework for REST api. I have rest_framework.authentication installed. I use custom authentication model. class CustomUser(AbstractUser): is_authenticated = models.BooleanField(default=True) is_active = models.BooleanField(default=True) userid = models.CharField(max_length=255) username = models.CharField(max_length=50) password = models.CharField(max_length=255) last_login = models.DateField(default=timezone.now) My problem is that I am getting "The current error page you are seeing is being redirected to the login screen by REST Framework's Session ca3bfb1094
